DETAILED ACTION

Response to Arguments

1. Applicant's amendment Of 1 May 2006 cancels claims 1-39 and adds claims 40-75.

Specification Objections

2. The disclosure is objected to because it contains an embedded hyperlink and/or other form of browser-executable code. Applicant is required to delete the embedded hyperlink and/or other form of browser-executable code. See MPEP § 608.01.

Applicant's arguments regarding this objection appear to misunderstand the rejection, the links have nothing to do with the method of filing, they are text that appears in the specification, which when electronically published, as for example an web page of the patent would be interpreted by the browser as executable links to other web pages eg. phone.com on page 1, multiple occurrences of "http:...." on pages 20-23.

Further, the specification appears to be a literal translation into English from a foreign document and are replete with grammatical and idiomatic errors.

Appropriate correction is required.

3. Newly submitted claims 40-75 directed to an invention that is independent or distinct from the invention originally claimed for the following reasons:

The original invention was related to radio portable terminals payment status management.

The new claims are broadly to calculating usage fees for use of applications with user's paying a fixed amount periodically.

Since applicant has received an action on the merits for the originally presented invention, this invention has been constructively elected by original presentation for prosecution on the merits. Accordingly, claims 40-75 are withdrawn from consideration as being directed to a non-elected invention. See 37 CFR 1.142(b) and MPEP § 821.03.
